How Do I Know If My Computer Is Secure? (Tips for the non-techie)

1. Craig Petronella's #1 tip for healthcare providers and practice managers about computer network security?

Do a Security Risk Assessment quarterly. It is not enough to just have anti-virus and anti-malware off-the shelf solution.

2. What are the potential risks to your healthcare practice if you don't have good computer security and privacy practices implemented?
3. Do not use email to send personally identifiable information. Instead, do this:
4. What are the benefits that healthcare practices will notice after they complete a security risk assessment?

**Practice Management Nuggets©
Learning Resources Guide**

Download the Security Risk Assessment - a gift to you from Craig!

Remember - go to www.HasMyPracticeBeenHacked.com to get the download links.

Download and share with your computer support provider. If you don't have a computer support provider now is a good time to find a reputable team who can help you conduct the Security Risk Assessment and make sure that you have taken steps to ensure that your computers, your practice, and your patient information is safe.

Awesome Gift #2

Craig surprised me with another special gift for you! Free access for 1 year to his on-line **Security Awareness Training! For your Entire Team!!!**

Use this as part of your privacy and security compliance legislation and regulations!

To get you started with the training, Craig needs to know your email addresses and names.

USE THE LINK BELOW to send an email to Craig below to request your access to the Silver - Level Security Awareness Training.
